## Community impact

Clean Energy Financing is helping Bridgewater homeowners save on energy bills and improve their home's comfort. Mark and Lisa installed heat pumps and new insulation through the program which has made their home more comfortable.

"The insulation has made a huge difference to temperature stability," says Lisa.

"The fact that you don't have to pay any money upfront is the reason we were able to participate."

## How to apply

Clean Energy Financing has a quick and easy application process with no income testing or credit check. We aim to get you through the program within six months of receiving your application.
